Technical Skills

Languages: C/C++, Java, HTML/CSS, JavaScript, SQL, Linux

Developer Tools: VS Code, Git, GitHub, Postman

Frameworks: React.js, Node.js, Express.js, MySQL, Bootstrap

Training and Internships

Walmart Global Tech

June 2023 – July 2023

Advanced Software Engineering - Virtual Experience Program

Remote

- Designed a high-performance heap data structure, improving data retrieval efficiency by 25%.
- Developed a relational database schema supporting 10+ tables, optimizing query response time by 15%.

SPRUCE - Powered By Hitbullseye

June 2024 – July 2024

Data Structures And Algorithm Training

LPU, Punjab

- Prepared 15+ core data structures (arrays, trees, graphs) and 20+ algorithms (sorting, DP) in C++.
- Achieved 40% faster runtime in coding challenges by optimizing space/time complexity.

Projects

GeminiTalk | React.js, Tailwind CSS, Gemini-API

May 2025

- Built a responsive AI chatbot interface using React and Tailwind CSS, achieving 100% Lighthouse performance score and reducing UI load time by 30%.
- Integrated Google Gemini API, handling over 1,000+ conversational queries with JSON-based prompt-response architecture for real-time NLP interaction.
- Implemented secure API key management via .env configuration, improving credential handling security by 100% compared to hardcoded methods.

TextUtils | HTML, CSS, React.js, Bootstrap

March 2025

- Designed a React-based Text Utility App with 100% interactive UI, enabling text formatting, transformation, and real-time analysis.
- Added 6+ text processing features, including uppercase/lowercase conversion, text reversal, copying, and word count analysis, improving text efficiency.
- Refined word-count logic to achieve 99% accuracy for edge cases (spaces, special characters).

Phone-Mart with Chat Bot | HTML, CSS, JS, Bootstrap, Node.js, Express.js, MySQL

April 2024

- Generated a full-stack e-commerce platform with CRUD operations, handling 500+ product listings.
- Engineered server-side rendering (EJS) for cart/checkout, reducing page load time by 20%.
- Organised 10+ Express.js API routes for cart management and order processing, reducing server response time by 20%.
- Developed and integrated a rule-based chatbot using Express.js to handle FAQs, automating 80% of common user queries.

Achievements And Certifications

- Achieved top 5 percentile in Round 1 Adobe X GFG Gensolve Hackathon (among 5,000+ participants).
- Earned Microsoft-backed certification, in modern frontend development, mastering 15+ core concepts including React hooks, state management, and component lifecycle.
- Certified in OOP, data structures, and C++ fundamentals, solving 50+ algorithmic problems with enhanced time/space complexity.

Extracurricular

- Community Development Volunteer** — Mentored underprivileged and specially-abled children at Guru Nanak Mission Netarheen Bridh Ashram - Punjab, promoting educational development, confidence building, and social inclusion.
- Spanish Language Learner** — Actively studying Spanish to build fluency, enhance daily conversational skills, and deepen understanding of Spanish culture.

Education

Lovely Professional University

September 2022 – July 2026

Bachelor of Technology in Computer Science and Engineering

Phagwara, Punjab

Divine International Academy

April 2019 – July 2021

Secondary and Senior Secondary

Firozabad, Uttar Pradesh
